

## **Ranching with Predators in Oregon**

**Co-hosted by Strategic Ranching on a Landscape with Wolves, Working Circle and Defenders of Wildlife**

As stewards of the lands where wildlife, including expanding predator populations reside, ranchers are facing increased challenges and pressures in this ever-changing world. Ranching with Predators in Oregon is an opportunity for livestock producers to come together to discuss shared experiences while hearing from both regional and out of state landowners regarding the challenges faced, and successful strategies learned for ranching with wolves and other predators.

This workshop is designed to be the start of what we hope will be an on-going and meaningful discussion between those seeking to find long-term and sustainable strategies to working with predators on shared landscapes and ensure ranchers can keep ranching in the modern world.

### **Agenda**

9:00 – 9:10 Welcome and intros (Working Circle)

9:10 – 9:30 A Rancher's Perspective (Shella and Barry DelCurto)

9:30 – 10:20 Resilient Ranching in the Modern World (Hilary and Andrew Anderson)
